P. O. Box 35090
Louisville, Kentucky 40232

Dear Dorothy:

We have shipped you the following bobbins of brown cigarette paper and tipping that we have been discussing for use on "Project Whitney." As I described to you, the bobbins are not exact matches for the previous samples but are reasonably close considering a different engraving, a different press and paper from a different machine run. You will probably want to make some hand prototypes for the brands people to evaluate before making cigarettes.

The specific bobbins are identified as follows:

TOD 00763, brown cigarette paper, Color B (2.3% citrates) printed with a black dot pattern and then electrostatically perforated to 75 Coresta porosity, 3 bobbins, 27 mm x 6000 M

TOD 00764, Reference 30726 brown tipping overall printed to match Color B, overprinted with a black dot pattern and then micromechanically perforated, 30 mm center-to-center (Phobos Coresta porosity = 350), 3 bobbins, 52 mm x 2000 M

TOD 00765, brown cigarette paper, Color A (2.3% citrates) printed with a black dot pattern and then electrostatically perforated to 75 Coresta porosity, 3 bobbins, 27 mm x 6000 M

TOD 00766, Reference 30726 brown tipping overall printed to match Color A, overprinted with a black dot pattern and then micromechanically perforated, 30 mm center-to-center (Phobos Coresta porosity = 350), 3 bobbins, 52 mm x 2000 M
