INTEROFFICE MEMORANDUM

DATE: 5/29/87

TO: Dr. J. H. Robinson

FROM: J. H. Reynolds

SUBJECT: Urine Mutagenicity/Smoking Behavior Study to Support NPT

The Human Research Review Committee met on May 29, 1987 to consider your proposal. The consensus of the Committee is that your proposal is approved, subject to the following restrictions:

Only one type of test product will be used in any of the studies. That product will have received prior approval by the Committee.

The reference product will be as previously described to the Committee.

R&D Management must be informed by you or Dr. J. R. Hayes that the blood profile data would not show effects due to chronic exposure. Evaluation of blood profile data must take this into account and not over-interpret. Longer exposure times would be needed to observe changes in blood profile data owing to chronic exposure.

John H. Reynolds
