Attachments: RFMS Mkt-RA Oxy 15-30 tabs Oxy APAP 4 strengths REV 2.doc

I have attached the current posted MKT RFMS. I believe Laura sent this to you, but for ease I re-sent it.

The current is Rev 1. The addition of 5000 ct means it will start as rev 2. We do this so we can follow the history of changes.

If you update this and highlight in yellow your additions, I will add the revision section update.

It appears this is an earlier form as the NDC is included on more recent ones. I'm not sure it is value added to transcribe everything, but we can add it in the rev 2 section if need be.

Also, add Bunny's comments if that is what you want, to duplicate the 5/325. I assume it is.

Thanks....hope this helps

Scott

I made some minor revisions also.

Do we need to include any comments that ensure the same tote will be used that is for the 5/325mg?

I assume the NDC number will be added to the form as well.

Bunny

Scott,

I have updated the RFMS. Please find it attached. The NDC# assigned to this product is 0406052391 (Oxy/Apap 10/325 Tablets, 5000 ct).

Let me know if you have any questions.

Thank you,

Kate Muhlenkamp

Hi Kate

When you update the MKT RFMS, please send back to me. I'll work on this for you.

Thank you

Scott

Attached above is RFMS for 10/325 for you to request the 5000ct to get the project moving forward.

Attached below is the Sizing form for 5/325 that you can refer to – this is what we would mimic for the 10/325. I misspoke, we went from round to square as this states.
