D. G. FELTON

DGF/VC/79

2nd October, 1964

In reply to your enquiry regarding the interest in Canada in the grey leaf problem, I enclose photocopies of correspondence between Montreal and here which refers to the interest in our reports and work expressed by the Canadian Department of Agriculture Experimental Farm at Delhi. The interest arose in the first case in a letter from Leo Laporte to you dated 15th December 1961, which you photocopied and sent to us. This should be on your file 79 together with your reply of 19th December 1961.

Following this date, there has been quite a lot of correspondence between us, of which you will have received some copies but not all, and the attached photocopies should complete your file.

We have also had one letter direct from Delhi dated 3rd July 1963, and you received a copy of Mr. Wood's reply of 26th July, following which we have received no further correspondence.
